## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to RCE and Amendment***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claims 4-9 and 14-19 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5. Claims 4 and 14 do not read on the elected species but rather on at least non-elected species P.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 11-13 are rejected under 35 U.S.C. 102 (b) as being anticipated by Larinoff. See at least figures 3-4, 8-9, 14-15 and 18-19. Support structure is read as item "50" and plate members "12" have resilient member(s) "14" or "16" and "18".

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3743

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 10 and 20 are rejected under 35 U.S.C. § 103 as being unpatentable over Larinoff in view of Jan-Ove et al. The patent of Larinoff discloses all the claimed features with the exception of a pair of support members.

The patent of Jan-Ove et al. discloses that it is known to have a pair of support members for the purpose of retaining the heat exchanger plates in position. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Larinoff a pair of support members for the purpose of retaining the heat exchanger plates in position as disclosed in Jan-Ove et al.

#### ***Examiners Remarks***

The allowable subject matter appears to be the U-shaped opening (121) immediately to the side of the flexible arm (120) as illustrated in Fig. 1B in applicant's invention.
